EDUCATION

The Pennsylvania State University ***University Park, PA***
Smeal College of Business *Class of 2027*
Bachelor of Science in Finance GPA: 3.56/4.00
Smeal Real Estate Analysis & Development Certificate
Relevant Courses: Security Analysis and Portfolio Management, Financial Management of the Business Enterprise, Corporate Finance, Financial and Managerial Accounting, Real Estate Fundamentals

Work Experience & Clubs

Shree Gita Gining and Oil Industries ***Gujarat, India***
Marketing Intern *May 2025 – Aug2025*

- Accelerated brand relaunch and retail expansion strategy by leading an 8-episode digital campaign and collaborating on product redesign initiatives projected to increase retail presence by 30%
- Improved operational and distribution efficiency by analyzing procurement cycles, production volumes, and retail partnerships, optimizing reinvestment decisions and distribution economics with Reliance Mart

Shree Gita Gining and Oil Industries ***Gujarat, India***
Finance Intern *May 2026 – Aug 2026*

- Supported financial reporting and analysis by building structured Excel models tracking revenue, production volumes, and segment-level performance across cotton ginning and edible oil operations
- Examined period-over-period financial data to identify cost and revenue trends within procurement and distribution cycles, translating findings into actionable insights for senior management

Projects and Certification

Amazon Equity Valuation & Investment Analysis Project (Independent Project) *January 2026*

- Analyzed Amazon (AMZN) by building a five-year DCF and comparable company valuation model, assessing segment-level revenue drivers across e-commerce and AWS, margin expansion, reinvestment needs, and WACC to estimate intrinsic equity value and support an investment recommendation.

Stock & Portfolio Trading Analytics Platform (Independent Project) *April 2026*

- Developed an Excel-based trading decision-support system that analyzes individual stocks and multi-asset portfolios using live market data, return, volatility, Sharpe ratio, drawdown, covariance, and VaR; automated stock signals and add/swap scenario analysis to assess investment attractiveness, timing, diversification, and downside risk across portfolios of up to 10 securities.

Offline Neural Intelligence & Automation System (Independent Project) *September 2026 – Present*

- Architected a local-first desktop assistant powered by a tiered neural engine routing tasks across deterministic and reasoning modules; engineered a verification framework validating real-world outcomes before task completion; and pioneered a first-of-its-kind camera-gesture control system enabling spatial point-pinch-and-drag interaction fused with voice commands

Microsoft Office Specialist: Excel Associate Certificate *Present*

- Developing industry-level proficiency in Microsoft Excel (Microsoft 365 Apps) by applying advanced worksheet management, formulas, tables, and data visualization to build professional budgets, financial statements, and performance dashboards.

SKILLS

- Excel, DCF & Valuation Modeling, Financial Modeling, Claude Code, Codex, PowerPoint, Bloomberg Terminal
